EXAMINERS AMENDMENT AND REASONS FOR ALLOWANCE

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Wei Te Chung on July 23, 2004.

2. The application has been amended as follows:

* Claim 1, last line, the period has been changed to a semicolon and the following paragraphs have been inserted thereafter:

-- wherein a plurality of third contacts disposed in the second elongated wall and in alignment with the cavity in the transverse direction, and further comprising a plurality of wires electrically connecting with the third contacts;

wherein the second elongated wall is thinned except for a portion receiving the third contacts;

wherein the second elongated wall has an expanded portion integrally formed on an exterior face thereof and in alignment with the cavity in the transverse direction;

wherein a plurality of third contacts and a plurality of wires electrically connecting with the third contacts, and wherein the expanded portion defines a plurality of passageways receiving the corresponding third contacts;

wherein a spacer mounted on a rear face of the housing to seal the rear face except for a

plurality of slits through which the first, the second and the third contacts extend rearwardly;

wherein each contact comprises a contact portion with a curved contact section exposed in the central slot of the housing, a tail portion extending outwardly from the housing, and a retention portion connecting the contact portion and the tail portion;

wherein a cover over-molded on the housing to cover the first, the second and the third contacts and the wires;

wherein the tail portions of the first and the second contacts are arranged in a first row, and wherein the tail portions of the third contacts are arranged in a second row offsetting from the first row in the transverse direction. –

*Claim 6, last line, -- . -- has been inserted after “rearwardly”.

* Claim 18, last line, the period has been changed to a semicolon and the following paragraphs have been inserted thereafter:

-- wherein the second passageways are formed in an expansion portion of the second wall, and a cavity is formed in the first wall aligned with the expansion portion in a transverse direction perpendicular to both said longitudinal direction and said front-to-back direction. --

_ Delete claims 2-9 and 19 are deleted.

3. The following is an examiner's statement of reasons for allowance:

In regarding to claim 1, none of prior teaches or suggest an electrical cable assembly comprising a cavity recessed from an interior face of the first elongated wall and in communication with the central slot in a transverse direction; and a curved contact section of a contact portion exposed in the central slot of the housing, a retention portion connecting the contact portion and a tail portion and the tail portion extending outwardly from the housing, a
